Mobile Print

The mobile print solution allows patrons to send document to the library printer system from both outside and inside the library. This can be accomplished via two methods:
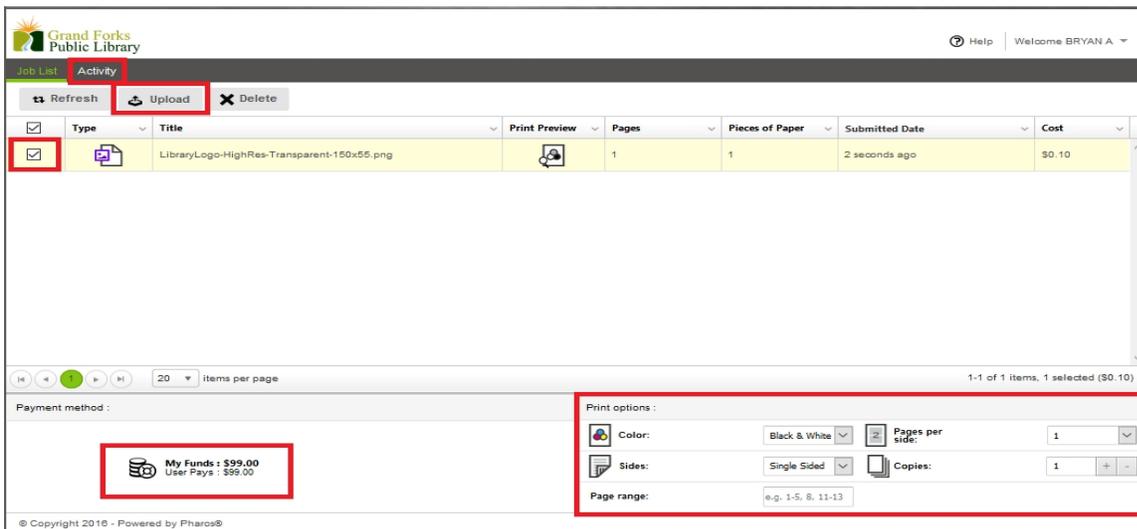

1. Mobile Print Web Page
2. Mobile Print E-mail

Mobile Print Web

The mobile print web page is accessible by going to the address **print.gflibrary.com** in a modern web browser such as Internet Explorer 11, Edge, Firefox, Chrome, Safari, as well as mobile browsers on smart phones.

Log on using your library card number and password.

Once you are logged in, you can view the available funds on your card, upload documents to the print queue, delete documents, modify document print settings on selected documents, and view your activity history.
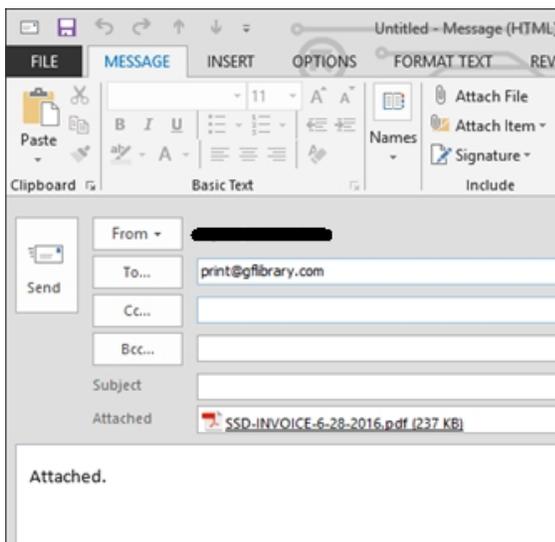

*Please note: Currently, IOS devices will not upload documents-they will have to send it to their email in order to print.
*The Patron Printer will only print 1 page per side even though it offers the option above.

Mobile Print Email

To add a print to the queue using email, send the document as an attachment to the address:

print@gflibrary.com

If you have not setup the account, you will get a response email asking you to click the link to verify the account.

Follow the link "Click to register your email address" to associate your email with your library card number.
